

GDG USAR Project Showcase Guidelines (2026)

Document Type: Event Operational Guidelines | Published by GDG On Campus USAR

1. Annual Project Showcase Format

The GDG USAR Annual Project Showcase provides student developers an opportunity to exhibit capstone projects and hackathon solutions to industry mentors.

Each team is allotted a 5-minute technical pitch followed by a 2-minute live Q&A session with judges.

Presentations must include a live working demo of the application or deployed model.

2. Evaluation & Scoring Rubric

Projects will be evaluated by a panel of judges using the official 100-point scoring rubric:

- Technical Execution (40 points): Code quality, architecture robustness, and test coverage.
- Innovation & Originality (30 points): Novelty of the problem-solving approach and creativity.
- Community & Real-World Impact (30 points): Practical usefulness for students or the broader public.

3. Submission Requirements

All project teams must submit a public GitHub repository link 48 hours prior to Demo Day.

Submissions must include a README.md detailing project goal, setup steps, and how to run.

Teams utilizing generative AI models must also include an AI_USAGE.md file as mandated by club policy.
